SUMMARY

Computer Science student at KNUST (Level 200, First Class) who builds full-stack, AI-integrated applications for Ghanaian users. Co-developer of ScholarLink GH, an AI scholarship-matching platform built with a 4-person team for CodeQuest 2026, and founder of BundleHub GH, a live mobile data reselling business. Works across Spring Boot, React Native/Expo, and Node.js on both frontend and backend.

EDUCATION

BSc Computer Science, Level 200 — Kwame Nkrumah University of Science and Technology (KNUST) Expected 2028
Current Standing: First Class

WORK EXPERIENCE

Software Development Intern — OpenLabs Ghana Late 2025

- Assisted trainers in frontend development classes and occasionally led teaching sessions
- Built and led a frontend project used as a teaching resource within the course

PROJECTS

ScholarLink GH — AI-Powered Scholarship & Career Platform — CodeQuest 2026 Submission

Full-Stack Developer, Team of 4 | Spring Boot, PostgreSQL, React Native/Expo, Gemini AI

- Built a platform where Ghanaian students can find verified scholarships, career listings, and internships in one place, instead of hunting across scattered and unreliable sources
- Built an AI matching engine (Gemini) that recommends scholarships based on a student's academic and personal profile
- Added an AI feature that reviews student essays and application documents before submission
- Gave students two ways to apply: directly through the scholarship provider, or through a paid in-app application service
- Built a credit system for AI feature usage, plus JWT-based authentication and file handling through Cloudinary

BundleHub GH — Mobile Data Bundle Reseller Platform — Abdul-Sobur Enterprise

Founder & Developer | Node.js, Express, TypeScript, Prisma, Next.js, PostgreSQL

- Founded and built a live platform selling discounted mobile data bundles to Ghanaian customers — self-funded, still early-stage
- Built the payment and delivery pipeline: Pystack for payments, Remadata for data provisioning, Arkesel for SMS notifications
- Wrote the routing logic so other providers (Telecel, AirtelTigo) can be added later without reworking the core system — currently MTN-only
- Used BullMQ to queue transactions so a purchase doesn't get lost if a provider request is slow or fails
- Deployed the backend on Render and frontend on Vercel, with a custom domain

TECHNICAL SKILLS

Languages: Java, JavaScript/TypeScript, SQL

Backend: Spring Boot, Node.js, Express

Frontend/Mobile: React Native (Expo), Next.js, React

Databases: PostgreSQL (Neon)
Cloud/DevOps: Render, Vercel, EAS Build
Tools: Git/GitHub, VS Code, IntelliJ IDEA, Postman
APIs/Integrations: Gemini AI, Paystack, Cloudinary, JWT/Spring Security

CERTIFICATIONS

- Frontend Web Development — ZapTech (2025)
- Python for Programmers — IBM SkillsBuild (2026)
- Fundamentals of Responsible AI for All — KNUST (2026)
- Claude Code in Action — Anthropic (2026)

LEADERSHIP & ACTIVITIES

- Main Dining Hall Prefect** — *T.I. Ahmadiyya Senior High School* 2022 – 2023
- Oversaw food service management and distribution, ensuring equitable and timely meals for the student body
 - Maintained dining hall cleanliness and readiness standards ahead of each service period
- Boys' Prefect** — *T.I. Ahmadiyya JHS 'A', Asafo* 2019 – 2020
- Held student leadership responsibility during Junior High School (separate term from primary school prefecture)
- Boys' Prefect** — *T.I. Ahmadiyya Primary School, Asafo* 2016 – 2017
- Held student leadership responsibility during Primary School (separate term from JHS prefecture)
